Press release

CAMPUS wall-mounted urinal – New stainless steel urinal

In this in-series installation, the stainless steel CMPX539 wall-mounted urinal has been combined with electronic F5E urinal flush valves for concealed mounting.

A bright and friendly design, combined with long-lasting and easy-to-clean surfaces, supports the clean look of urinal systems, which also have to deal with a real onslaught. Only robust and stable equipment solutions meet these requirements.

Maximum reliability, easy care and simple maintenance impress users. For sanitary equipment, we recommend urinals that are made of easy-to-clean stainless steel.

The new stainless steel CAMPUS wall-mounted urinal optimally meets the conditions mentioned. The oval basin shape has the best outflow properties. The solid, rounded shape with silk-matt surface is long-lasting, even with extremely frequent use, and is easy to clean.

The spray head, which is also made of stainless steel, can be connected to various flush valves from Franke Water Systems' product range using the connection hose that is included in the scope of delivery. The CAMPUS urinal has been tested, and its design and functions comply with standard EN13407.

KWC Group Ltd.

KWC Group Ltd. is an international premium manufacturer of taps and comprehensive sanitary solutions.
