F5E - A3000 open electronic WC flush valve for in-wall installation, with piezo push-button

NEW

F5E - A3000 WC flush valve DN 20 as finished installation kit for in-wall installation in basic installation kit, electronically controlled. With solenoid flush valve fitting group I including enclosed throttle insert to reduce the flush volume, holding frame with profile seal and stainless steel cover plate 190 x 245 mm with integrated piezo push-button and covered screw fixing. With waterproof electronic

module with an additional input for customer-provided sensors (buttons), maximum distance to electronic module 5 m and electric T-junction for connection to system cable. Depth adjustability 20 mm. Activated hygiene flushing 24 hours after last operation. With facility for parameterisation, cleaning stop and communication via ECC2 function controller, 24 V DC.

**Technical Data**

Built-in fitting model
Cover plate height
Cover plate width
default automatic hygiene flus
Flushing volume adjustable
functional principle
hygiene flushing
diameter nominal
maximum flushing flow
minimum flow pressure
Parameterization
power supply connection
Type of power supply
protective shutdown
with transformer/power supply
type of flushing fitting
type of mounting
type of operation
type of sensor
